

QUALITY POLICY STATEMENT

DSC's primary Quality objective is to enhance the effectiveness of our business so as to achieve the highest level of quality in supplying engineering consulting services to our clients. We aspire to deliver project outcomes on time, within budget, in conformance with our brief and to the satisfaction of our clients.

Critical to this objective is our focus on understanding the needs and expectations of clients and working effectively and pro-actively with the various organisations making up a project design team.

The DSC Quality system via its policies and procedures satisfies the requirements of ISO 9001 and provides both guidance and governance for all Staff and Suppliers to achieve the above objectives.

The management of DSC are committed to the ongoing improvement of the Quality Management System. This is achieved by continual review and adjustment of the system for effectiveness and by encouraging and providing an environment for Staff to strive for excellence in the performance of their roles.
