

Robert Sigley

Consulting Director + Mechanical Engineer

Experience: 40+ years – DSC: 26 years

- Mechanical Engineering Certificate – TAFE Sydney Institute

Career Background

Robert has over 40 years of experience in all facets of building services consultancy, ranging from the development of technically challenging solutions to sympathetic heritage refurbishments, for both commercial and government clients. With extensive project experience gained both locally as well as in England and Saudi Arabia he provides expertise in system conceptualisation, project administration and team management.

Robert's experience has focused on providing effective solutions appropriate to client needs. He specialises in automation through BMS control and advancements in Information Technologies and demonstrates a strong Facilities Management focus, addressing the need for manageable and sustainable long term solutions.
